

User Evaluation Consent Form

Participating in this user evaluation of the “Aloha Campus” app will involve recording your name, class (freshman, sophomore, etc), and responses to each test prompt.

You will be asked to read 3 separate prompts followed by 3 corresponding tasks to carry out in the app. You will then be asked subjective questions about the app related to the task. Your responses to these questions will be recorded to allow the project team to evaluate the usability and viability of the features of the app tested in this evaluation. People outside the project team will also view your responses; however, they will be anonymized.

Please read the statement below and sign where indicated.

I understand that my name, class, and usability test session responses will be recorded. I grant the project team developing “Aloha Campus” permission to use this data for internal use related to the usability and viability of the app and for the purpose of presenting the usability and viability to people outside the project team (anonymized).
